ABOUT

TaskForce Red LLC provides computer forensic services including gathering and analysis of records from electronic devices to help find the evidence you need to process your case!

We have one of the most comprehensive service offerings in the industry, ranging from forensic imaging and eDiscovery hosting to data recovery and proactive employee monitoring services.

Our forensic lab utilizes high-speed drive duplicators and high-end forensic workstations to process evidence all running AccessData's FTK forensic software , combined with secure encrypted storage for case data.
